iN/TRAXX™
Integrated Vehicle Component System

STORAGE SOLUTIONS

iNTRAXX storage options
securely attach to iNTRAXX tracks, allowing you to position them exactly where you need. Every storage solution is crash-tested to withstand forces up to 26g.

INTRAXX offers versatile storage solutions, including instrument and supply pouches, a portable case, a modular overhead cabinet system, and multiple mounting options for secure vehicle integration.

SafePouches are individual pouches with clear flap enclosures plus a pocket for custom labels. SafePouches fit:
- Inside new iNCASE and older style SafePak bags,
- To wall tracks using Pouch Mounts, or
- Direct to vehicle walls using Pouch Mount Plates.

iNCASE is the new semi-rigid zipped bag. Its interior is lined with pouch mounts which securely hold SafePouches in position. **NEW**

Contents can be accessed while the iNCASE bag is mounted to the wall, or removed for use on-scene.

iNCASE mounts to wall tracks via SafePak Multi-Mount plates.

Original SafePaks and SafeCabs are illustrated to provide a visual reference and comparison beside the next generation iNCASE and iNCAB

iNCAB is the revolutionary, new iNTRAXX storage cabinet which replaces the older style SafeCab.

iNCAB's modular design results in a cabinet that is both strong and lightweight, while also being expandable to suit your changing storage needs or vehicle.

iNCAB cabinets attach to iNTRAXX wall tracks **NEW**

⊛FERNO®
iNCASE Portable Storage 0480252

NEW

The new iNTRAXX iNCASE is a semi-rigid case designed with integrated pouch mount carriers to securely hold SafePouches inside the case. Strong yet lighter than its predecessor, the iNCASE is a streamlined upgrade from the original SafePak, which has now been retired.

Contents remain visible and easily accessible while the case is mounted on a vehicle wall, but can be quickly removed for use in the field. The iNCASE and SafePouch system is ideal for "make-ready" or swap-n-go restocking methods to efficiently resupply vehicles.
Features

- Semi-rigid casing is softer and safer in the event of a head strike during an accident
- User-friendly rubberised handles lock together for easy carrying
- Heavy-duty zip with glove-friendly pulls
- Easy to clean and decontaminate
- Supplied as requested without pre-configured pouches
- Pouches and Pouch Kits are sold separately to suit your specific needs

Quick References

- For pouch kits and individual pouches, refer to page 3
- For iNCASE mounting options to the vehicle, refer to page 6

SafePouch Individual Pouches

SafePouches are individualised pouches with clear flap enclosures plus a pocket for customised labels to identify each pouch or its contents if desired.

The pouches feature an innovative latching system that attaches and detaches pouches to walls and bags with one simple movement. SafePouches are available in a range of sizes and two depth options:
- Standard, with a depth of 70 mm (2.75 in.)
- Jumbo, with a depth of 120 mm (4.72 in.)

The **Jumbo SafePouch** offers increased capacity to accommodate bulkier items and provides more flexibility for equipment storage. Due to their larger size, Jumbo pouches can only be mounted on one side of the iNCASE. Standard SafePouches must be used on the opposite side. Pouches can be attached:

- Inside the new iNCASE or older style SafePak cases
- To iNTRAXX tracks or
- Direct to the vehicle wall via a mounting plate.

Quick References

- For pouch kits, refer to page 4

SafePouch Pouch Kits

The new Pouch Kits are curated sets of individual pouches designed for use with the new iNCASE and older style SafePaks or for mounting on vehicle walls.

Each kit features a selection of the most popular Standard pouches, grouped into the three most commonly requested combinations. Pouch Kits also offer cost savings compared to purchasing items individually.

iNCAB Modular Cabinets

NEW
The new **iNCAB** is the latest addition to the iNTRAXX range of storage solutions. Its innovative, modular design results in a cabinet that is both strong and lightweight, while also being expandable to suit changing needs.

iNCAB attaches to the iNTRAXX track using integral mounts. Its contoured shape fits into both box and curved wall/ceiling spaces, while the clear, flip-up hinged doors allow easy visibility and access to cabinet contents from both seated and standing positions.

Features and Benefits

- Modular design allows multiple cabinets to be joined together
- Unobstructed storage space when two or more cabinets are joined
- Strong yet lightweight storage solution
- Assists in reducing overall vehicle mass
- Easy to clean and decontaminate
- 13.2 lb / 6 kg load capacity per cabinet module
- **Standard module** comes with clear door and red sides

How does the iNCAB work?

To make a double cabinet:

1. Start with one iNCAB 500 (0480258) cabinet. On the joining side, remove the red side panel for later use.
2. Add an iNCAB Connection Kit (0480257) plus an iNCAB 500 Module (0480259).
3. Refit the red side panel to complete the double cabinet.

SECURING iNCASE AND POUCHES TO VEHICLE WALLS

iNCASE / SAFEPAK **MULTI-MOUNT**

The Multi-Mount provides a secure way to mount an iNCASE or SafePak in a vertical, open position on vehicle walls.

Designed as the next-generation mount for iNTRAXX cases, it replaces the original SafePak Mount with a lighter, lower-profile design and a smaller footprint—making it easier to install in more locations throughout the vehicle.

- The Multi-Mount fastens to the iNTRAXX track via a Safemount connector.
- **Available in two sizes**: the popular 2-row version and a larger 3-row version.
- Multi-Mounts are offered in **two configurations**: with a SafeMount included, or a stand-alone mount (without the SafeMount).

Rear view with Safemount

3-Row Multi-Mount (front view)

iNCASE / SafePak Multi-Mount 2-Row

Product Code and Description	• 0480201 Multi-mount - 2 Row with Safemount • 0480207 Multi-mount - 2 Row Base Plate only
Dimensions	**W**: 401 mm (15.8 in) **D**: 44 mm (1.7 in) **L**: 423 mm (16.7 in)
Weight	• 2.45 kg (5.4 lb) including Safemount connector • 1.6 kg (3.5 lb) Multi-mount 2 row plate only
Load Capacity	12 kg (26.5 lb)
Accommodates	1 Small SafePak in closed position OR 1 Regular SafePak OR 1 iNCASE in closed position If using 2 units as illustrated, all case sizes can be secured open

2-Row Multi-Mount (attached to iNTRAXX track)

POUCH MOUNT CARRIER - SINGLE

Pouch Mount Carriers are used in the SafePaks, Pouch Track Mounts and Pouch Mount Plates. They form an integral part of the latching system to secure SafePouches.

POUCH TRACK MOUNT - SINGLE

The Single Track Mount can be installed anywhere on the iNTRAXX Track. It accepts and supports:

- 2 Small or
- 1 Medium SafePouch

POUCH TRACK MOUNT - DOUBLE VERTICAL

The Double Vertical Track Mount installs direct to the iNTRAXX Track and supports:

- 2 Medium or
- 1 Large Vertical or
- 4 Small SafePouches
POUCH TRACK MOUNT - DOUBLE HORIZONTAL

The Double Horizontal Track Mount installs direct to the iNTRAXX Track and supports:

- 2 Medium or
- 1 Large Horizontal or
- 4 Small SafePouches

DOC. ID 00668-R0 / APRIL 2025

Pouch Mount Plates offer an alternative way to use the iNTRAXX storage system without requiring iNTRAXX tracks. They install directly to the vehicle wall and are available in a range of sizes to suit available space and configuration preferences. Their low-profile design makes them ideal for confined spaces. They are lightweight, easy to clean, and simple to decontaminate.
